

Getting Pregnant and HIV: List of HIV-Friendly Reproductive Services and Providers ^[1]

Submitted on Dec 15, 2013

Unfortunately, it can be difficult to find a friendly health care provider who is knowledgeable about HIV and pregnancy. Some health care providers simply are not aware of the wealth of information about pregnancy planning for their patients living with HIV (HIV+). Perhaps even more challenging, though, are the judgmental attitudes that many health care providers still have.

Below is a list of friendly family planning providers who are informed about pregnancy planning for HIV+ people. If you are interested in adding your name, organization, or clinic to this resource list, please email us at info@thewellproject.org ^[2]. Thank you!
