

# Toward the Elimination of Sexual HIV Transmission: Integrating Reproductive Health

**WEBINAR: FRIDAY, OCTOBER 10, 2014**

**11 AM PST; 12 PM MT; 1 PM CST; 2 PM EST**

**Shannon Weber**  
Bay Area Perinatal AIDS  
Center (BAPAC)

**Cori Blum, MD**  
Chicago Department of  
Public Health

**Caroline Watson**  
BAPAC/PRO Men  
Outreach Volunteer

Preconception care and safer conception counseling offer a unique opportunity to embrace the reproductive health rights of HIV-affected couples while maximizing the health of both partners, preventing sexual and vertical HIV transmission, and preventing unplanned pregnancies.

## Did you know?

- The CDC estimates there are 140,000 heterosexual, HIV-mixed status couples in the U.S.
- Half of these mixed-status couples desire children
- Pregnancy increases both the risk of HIV transmission and acquisition. 85% of HIV+ women report at least one unplanned pregnancy

## Participants will learn about:

- PRO Men (Positive Reproductive Outcomes for HIV+ Men), an innovative initiative of the Bay Area Perinatal AIDS Center (BAPAC) and San Francisco General Hospital's Ward 86 HIV Clinic
- The BAPAC/PRO Men approach to integrated reproductive health including PrEP, safer conception and family planning
- Lessons learned on the road toward the elimination of sexual HIV transmission
- Coalition-building in Chicago around HIV, reproductive, and sexual health
- Building community engagement through consumer participation

There will be plenty of time for questions and we encourage all participants to share your experiences. You can also follow the conversation live via a simultaneous Twitter Chat using the hashtag **#HIVLoveWins**.
