Black Women's Health Imperative

Having Sex?

#LetsTalkAboutPrEP

Did you know?

87% of Black women newly infected with HIV were infected through heterosexual sex.

1 in 32 Black women in the U.S. will be infected with HIV in her lifetime.

PrEP can reduce your risk of HIV infection by **more than 90%**.

Protect yourself from HIV infection!

PrEP yourself with these simple steps:

- Get tested
- Take one pill each day
- Use condoms always
- Take charge of your sexual health to stay HIV negative

PrEP is part of your HIV prevention toolkit that includes getting tested and being aware of your sexual health.
