**WOMEN'S  
RESEARCH  
INITIATIVE  
ON HIV/AIDS**

The Women's Research Initiative on HIV/AIDS (WRI), a program of The Well Project, convened *Advancing Meaningful Inclusion of All Women in HIV Research and Clinical Trials* on May 12-15, 2022. The meeting sought to address the ways that women are systematically excluded from or under-represented in HIV research and clinical trials and identify solutions to address the underlying issues that perpetuate these inequities. Please [click here](#) or below to view the Issue Brief.

Highlights from the meeting include:

- Historically, **women have been insufficiently included and involved in HIV research**, reflecting a form of paternalism that has sought to “protect” women, particularly those with child-bearing capacity, from potential harms from research. **Such exclusion has resulted in limited knowledge about important aspects of women’s experiences of HIV** that would inform their active participation in decision-making about their health and well-being.
- **Specific populations of women** (including women of trans experience, women who use drugs, and women who sell sex, among others) **have been particularly marginalized** and excluded from HIV research.
- **Deficits in HIV research among women impair the overall HIV response**; in order to successfully end the HIV epidemic, relevant experiences and circumstances of all affected populations must be understood.
- In many cases, **the tools to address these challenges already exist**; it is now imperative that necessary changes are implemented by policymakers, researchers, funders, industry, and other stakeholders to ensure the meaningful inclusion and engagement of all women in HIV research. **Community engagement will play a fundamental role in these efforts.**

Image

Ensuring truly meaningful and equitable engagement of all relevant populations of women in HIV research?,? and including attention to the biomedical, behavioral, and social aspects of HIV

specific to women's lives, are vital to ending the HIV epidemic. While there have been significant strides made over the last four decades, there is still considerable work to be done. Success in this work requires concerted partnerships among all HIV research stakeholders that center the lives and experiences of diverse populations of women.

***WRI 2022 Meeting Participants***

**Adaora Adimora, MD, MPH\***  
**University of North Carolina School of Medicine Nancie Archin, PhD**  
**University of North Carolina Maryana Arsanious, PharmD**  
**Janssen Judith D. Auerbach, PhD\***  
**University of California San Francisco Dawn Averitt\***  
**The Well Project and WRI Richard Averitt**  
**Starchive.io Gina Brown, MD**  
**Gilead Sciences Danielle Campbell, MPH**  
**Community Vignetta Charles, PhD**  
**ETR Cecilia Chung**  
**Transgender Law Center Jenna Conley\***  
**The Well Project Elizabeth Connick, MD**  
**University of Arizona Ciarra Covin**  
**The Well Project Judith Currier, MD, MSc**  
**University of California at Los Angeles Antigone Dempsey, MEd**  
**HRSA HIV/AIDS Bureau Dazon Dixon Diallo, DHL, MPH**  
**SisterLove Karine Dube, DrPh**  
**University of North Carolina Gillings School of Global Public Health Olivia Ford**  
**The Well Project Maureen Goodenow, PhD**  
**Office of AIDS Research Grissel Granados, MSW**  
**The Well Project Rowena Johnston, PhD**  
**amfAR Jennifer Kates, PhD\***  
**Kaiser Family Foundation Aryah Lester**  
**Transgender Strategy Center Judith Levison, MD, MPH**  
**Baylor College Kathleen MacQueen, PhD, MPH**  
**FHI 360 Krista Martel\***  
**The Well Project Amaya Perez-Brumer, PhD**  
**University of Toronto Bridgette Picou, LVN**  
**The Well Project Tonia Poteat, PhD, MPH, PA-C**  
**University of North Carolina Linda Scruggs, MHS, LPC\***  
**Ribbon Eileen Scully, MD, PhD**  
**Johns Hopkins University Susan Sherman, PhD, MPH**  
**Johns Hopkins Bloomberg School of Public Health Vani Vannappagari, MBBS, MPH, PhD**  
**ViiV Healthcare Fulvia Veronese, PhD\***  
**NIAID, NIH (retired) Charles Wira, BS, MS, PhD**  
**Geisel School of Medicine at Dartmouth Carmen Zorilla**  
**UPR School of Medicine**

**\*2022 WRI Advisory Board Member**

**The WRI 2022 convening received sponsorship support or grants from Gilead, Janssen, Merck, and ViiV Healthcare.**
